Customer Problem Statement

I am	Customer and their attributes	A metro passenger who needs to travel between stations and wants to use a convenient digital ServiceNow-based ticket booking system instead of relying on manual ticket counters.
I'm trying to	What the customer is trying to achieve	Book metro tickets quickly by selecting the source, destination, passenger type, and number of tickets, with the fare calculated automatically and a digital QR-code ticket generated.
but	Problems or barriers	Traditional ticket booking can involve queues, waiting time, manual fare calculation, paper tickets, and additional effort to obtain and manage a ticket.
because	Root cause of the problems	The ticketing process may depend on manual counter operations and separate steps for selecting stations, calculating fares, making payment, and generating the ticket.
which makes me feel	Emotions caused by the problems	Frustrated and inconvenienced when booking takes too long, queues are crowded, or the ticketing process is not simple and transparent.

Combined Customer Problem Statement

I am a metro passenger who needs a convenient way to book tickets for travel. I'm trying to book metro tickets quickly through a digital ServiceNow system, but the traditional process can involve queues, waiting time, manual fare calculation, and paper tickets because multiple ticketing steps are handled manually, which makes me feel frustrated and inconvenienced when the booking process takes too long or is not simple and transparent.
